ISO 15378:2017

**BRC** 

- 100% qualified supply base
- Suppliers are audited and subject to BRC PM evaluation system
- We provide 100% traceability of direct materials used in our production

#### About us

The Polipack company was established in 1992 in the village of Gościcino in northern Poland. We have been specializing in the manufacture of high quality PP, PET and PE packaging for cosmetics, pharmaceuticals and supplements for 28 years, in volumes ranging from 5 ml to 8 l. Our company is developing dynamically and we have an advanced stock of machines enabling us to carry out complex projects.

Our modern equipment is central to our manufacturing processes. Our packaging is made both according to our own designs and according to our customers' individual orders — we also use both our own and entrusted moulds. New packaging designs are introduced every year. Our machine stock enables us also to provide overprints prepared using screen printing and multi-colour pad printing methods, as well as hot fusion film inlays on flat, cylindrical and oval surfaces on all the packaging we offer. Thanks to our decorations, your product will stand out from the rest – it will be easily distinguishable, identifiable and original.

Our wish is for the Polipack brand to be a synonym of the highest quality for our customers. Consistently we realize the vision of the business progress manifesting itself in the motto: THE PACKAGING CO-CREATES THE PRODUCT.

#### Trade shows, conferences in Poland and abroad

INTERPACK (Dusseldorf), ROSUPAK (Moscow), COSMOPACK (Bologna), PCD (Paris), VITAFOODS (Geneva), PLMA (Amsterdam and Chicago), Cosmetic Business (Warsaw and Munich), Five (Warsaw)

ISO

We hold the ISO 14001:2015 Environmental Management certificate.

We heat our premises with renewable energy from the ground or with heat recovered from cooling our production equipment, compressors and ventilation.

We use drinking water from the water system, using the e-spring treatment system.

Our production process and the method of processing PP, PE and PS involve 100% technological

Our waste from PET processing is 100% recycled and is used to produce clothes and multi-layer foil.

We protect our forests by using 100% biodegradable cardboard pallets, which are free of any splints and nails.

90% of our documents are circulated in electronic versions

We segregate our waste and use a closed process water circulation system.
